CAUTION: This telephone product is specifically designed for people with hearing difficulties and is provided with a handset earpiece volume control for individual requirements. Due care must be taken by all users that the handset earpiece volume control is set to the lowest level acceptable by each respective user. Care should therefore be exercised to ensure that any naive users are familiar with this requirement.

ATTENTION: Ce téléphone peut être destine aux personnes ayant des problèmes d’audition. Il possède un écouteur à volume variable. A la première utilisation, assurez vous que le bouton de réglage du volume soit positionné sur la position volume minimum. Les personnes malentendantes pourront par la suite augmenter le volume pour l’adapter à leur audition.
INDEX

**DESCRIPTION**

- Direct memory buttons
- Flashing incoming ring indicator
- Tone reception adjustment
- Phonebook insert card
- Volume reception adjustment
- Red light for tone and volume activation
- Memory storing key
- Time break recall button
- Mute button
- Last number redial

(*) Classified TNV-3 according to EN60950 standard.
1 - CONNECTING THE TELEPHONE

1 - Connect the handset cord.
2 - Open the battery compartment by pulling back the latch.
3 - Insert correctly 4 x AAA 1.5V alkaline batteries (not supplied) in the battery compartment (*). Batteries are required if you wish to increase the ringer level up to 10 dB.
4 - Snap the battery door back in place.
5 - Connect the line cord to the socket (*).

2 - RINGER SETTINGS

A switch located on the upper side allows the ringer to be switched HI, LOW, OFF:

폰 : Off,
 alumnos : Low,
 핸드셋 : Hi

(*) Classified TNV-3 according to EN60950 standard.

Your phone comes with the ringer switched to «High» and the melody set to «6»:

<table>
<thead>
<tr>
<th>Melody 1</th>
<th>Low</th>
<th>Mid</th>
<th>High</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Melody 2</td>
<td>4</td>
<td>5</td>
<td>6 (by default)</td>
</tr>
<tr>
<td>Melody 3</td>
<td>7</td>
<td>8</td>
<td>9</td>
</tr>
</tbody>
</table>

If you don’t like the ringer melody, you can choose a new one by changing the settings as per instructions below:

- Lift the handset.
- Press button.
- Press # button.
- Press any of the 1 - 9 dial keys.

The new ringer settings will be activated with the next incoming call.

Note: The ringer level will be increased up to 10 dB if you insert batteries into the battery compartment.
3 - DIALING TYPES AND GROUNDING

Switch ETR/PR/T is located on the upper side of English type models. If you wish to connect your CL1100 to a public UK/French switch-board (PBX), move switch ETR/PR/T to position 3 (T). This will ensure optimal compatibility of your phone with most (99%) PBX.

Positions: 1 2 3

Position 1:
Pulse dialing. The R is grounded. This option can be used only within the UK in very special cases.

Position 2:
Pulse dialing. The R is set according to the determined adjustment (see «Time Break Recall Setting for R Function» p.9).

Position 3:
Tone dialing. The R is set according to the determined adjustment (see «Time Break Recall Setting for R Function» p.9).

If you are using your CL1100 with a hearing aid, set your hearing aid to “T” position.

4 - TIME BREAK RECALL SWITCH (300/100)

Check the Time Break Recall setting of your CL1400. For the UK the Time Break Recall should be set to 100 mS. It can be switched to 300 mS for other locations or PBX’s.
TONE AND VOLUME ADJUSTMENT

1- RECEIVING VOLUME AND TONE ADJUSTMENT

You can adjust the receiving volume and tone according to your own hearing requirements.

The button \( \rightarrow \) allows extra volume and tone functions to be activated or deactivated during the conversation.

Tone and volume adjustment (15dB to 30dB) is only activated when the switch \( \rightarrow \) located at the upper side of your phone is set to ON. When this button is set to OFF only the volume can be adjusted from 0dB to 15dB.

When the function is activated, the red light of extra receiving and tone function button \( \rightarrow \) is lit.

Note: When the tone (treble), earpiece volume and sending levels are set to the maximum, whistling may occur. If whistling occurs the sending level settings should be decreased with the switch \( \rightarrow \).

TONE AND VOLUME ADJUSTMENT

2- SENDING VOLUME LEVEL ADJUSTMENT

Adjust the TONE and VOLUME buttons to fit the levels to your own hearing requirements.

If your voice is quiet or called parties have difficulty hearing you, you can increase the sending level volume with the switch located on the upper side. You can also decrease the sending volume if required.

Min Normal Maxi
USING THE PHONE

1 - ANSWERING INCOMING CALLS

- When an incoming call is received the phone will ring and the incoming call indicator will flash. To answer the call lift the handset and speak.
- On completion of the call, carefully replace the handset in the cradle to release the line.

2 - MAKING A CALL

- Lift the handset.
- Await the dial tone and dial required number.
- On completion of the call, carefully replace the handset in the cradle.

3 - LAST NUMBER REDIAL

- Lift the handset.
- Await the dial tone and press \( \) button.
- A previously dialled number will be automatically redialled (not in use for memory numbers).

4 - RECALL, * & # BUTTONS

These are used with the new services provided on digital exchanges. For details please contact your network operator.

5 - MUTE BUTTON

If you wish to speak privately to someone else in the room without your caller overhearing, press and hold the \( \) button. You will still be able to hear the callers but they cannot hear you during the mute operation. To resume normal conversation, release the \( \) button.

6 - STORING TELEPHONE NUMBERS

Your telephone CL1100 can store 12 direct memories.
To store a number please follow instructions below:
- Lift the handset.
- Press \( \) button.
- Press M1, M2, ..., M12 to locate the number.
- Dial the number.
- Press again \( \rightarrow \) Button.
Numbers will be lost after few hours if you disconnect your phone. Entering a new number in the same location will automatically erase the previous number.

7 - DIALING STORED NUMBERS
- Lift the handset and await the dial tone
- Press the appropriate location button M1, M2... M12 and the number stored in this location will be dialed automatically.
To register your stored phone numbers, use the index located on the front of your phone. Use this table to prepare your phone book.
