1 Important Safety Instructions

Some of the following information may not apply to your particular product; however, when using telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

1. Read and understand all instructions.
2. Follow all warnings and instructions marked on the product.
3. Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
4. Telephones should not be used while you are in a bathtub, shower or pool. Immersion of the telephone or handset in water could cause an electrical shock.
5. Slots and openings in the cabinet back or bottom are provided for ventilation, to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the product on the bed, sofa, rug, or other similar surface. This product should not be placed in a built-in installation unless proper ventilation is provided.
6. This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your dealer or local power company.
7. Do not allow anything to rest on the power cord. Do not locate this product where the cord will be abused by persons walking on it.
8. Do not overload wall outlets and extension cords as this can result in the risk of fire or electric shock.
9. Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a risk of fire or electric shock. Never spill liquid of any kind on the product.
10. To reduce the risk of electric shock, do not disassemble this product, but take it to a qualified service personnel when service or repair work is required. Opening or removing covers may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the appliance is subsequently used.
11. Do not expose the product to extreme temperatures such as areas near a hot radiator or stove or in a hot car.
12. Do not place lighted candles, cigarettes, cigars, etc., on the telephone.
13. Never touch uninsulated telephone wires or terminals unless the
telephone line has been disconnected at the network interface.

14 Never install or modify telephone wiring during a lightning storm.

15 Never install telephone jacks in wet locations unless the jack is specifically designed for wet locations.

16 Use caution when installing or modifying telephone lines to prevent electrical shock and/or fire.

17 Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
   A When the power supply cord or plug is damaged or frayed.
   B If the product has been exposed to rain or water.
   C If the product does not operate normally by following the operating instructions.
   D If the product’s cabinet has been damaged.
   E If the product exhibits a distinct change in performance.

18 Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.

19 Do not use the telephone to report a gas leak in the vicinity of the leak.

20 Do not place this product on an unstable cart, stand or table. The product may fall, causing serious damage to the product.

**IF YOUR PRODUCT UTILIZES BATTERIES, THE FOLLOWING**

**ADDITIONAL PRECAUTIONS SHOULD BE OBSERVED:**

1 Use only the type and size of battery(ies) specified in the user manual.

2 Do not dispose of the battery(ies) in fire. They may explode. Check with local codes for possible special disposal instructions.

3 Do not open or mutilate the battery(ies). Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.

4 Exercise care in handling battery(ies) in order not to short out the battery(ies) with conducting materials such as rings, bracelets, and keys. The battery(ies) or conductor may overheat and cause burns.

5 Do not attempt to recharge the battery(ies) provided with or identified for use with this product that are not intended to be charged. The battery(ies) may leak corrosive electrolyte or explode.

6 Do not attempt to rejuvenate the battery(ies) provided with or identified for use with this product by heating them. Sudden release of the battery(ies) electrolyte may occur causing burns or irritation to eyes or skin.

7 When replacing battery(ies), all batteries should be replaced at the same time. Mixing fresh and discharged batteries could increase internal cell pressure and rupture.
8 When inserting battery(ies) into this product, the proper polarity or direction must be observed. Reverse insertion of battery(ies) can cause charging, and that may result in leakage or explosion.

9 Remove battery(ies) from this product if storing over 30 days because the battery(ies) could leak and damage the product.

10 Discard “dead” battery(ies) as soon as possible since “dead” batteries are more likely to leak in a product.

11 Do not store this product, or the battery(ies) provided with or identified for use with this product, in high temperature areas. Batteries that are stored in a freezer or refrigerator for the purpose of extending shelf life should be protected from condensation during storage and defrosting. Batteries should be stabilized at room temperature prior to use after cold storage.

12 If your product uses rechargeable battery(ies), charge the battery(ies) only in accordance with the instructions and limitation specified in the User Manual.

SAVE THESE INSTRUCTIONS

2 Environment and safety

2.1 Safety information
This telephone is not designed for making emergency telephone calls when the power fails. An alternative should be made available for access to emergency calling.

2.2 Power requirements
This product requires an electrical supply of 120 volts, single phase alternating current, excluding IT installations defined in standard UL 60950.

2.3 Battery requirements
The handset requires power source of two rechargeable NiMH batteries, size AAA 1.2V 600mAh (Hr11/45). IF THE INCORRECT TYPE OF BATTERIES ARE USED, A WARNING MESSAGE WILL BE DISPLAYED.
Use only Philips Multi-Life 600mAh rechargeable NimH batteries.
For servicing or replacement, you can purchase a suitable headset through service centre or retail shop.

2.4 Telephone connection
The voltage on the network is classified as TNV-3 (Telecommunication Network Voltages, as defined in the standard UL
Following a power cut, the call in progress is lost.

**Caution**

Users should ensure for their own protection that the electrical ground connections of the power utility, telephone lines and internal metallic water pipe system, if present, are connected together. This precaution may be particularly important in rural areas.

### 2.5 Environmental care

Please remember to observe the local regulations regarding the disposal of your packaging materials, exhausted batteries and old phone and where possible promote their recycling.

### 2.6 Precautions

- Do not allow the handset to come into contact with liquids or moisture.
- Do not open the handset, base station or charger: This could expose you to high voltages.
- Do not allow the charging contacts of the charger or the battery to come into contact with extraneous conductive materials.
- There is a slight chance that the telephone could be damaged by an electrical storm. It is recommended that users unplug the phone from the USB socket and the phone line from the phone wall socket during a storm.
- Because the phone works by sending radio signals between the base unit and the handset, wearers of hearing aids may experience interference in the form of a humming noise.
- We advise that this phone should not be used near intensive care medical equipment, nor by persons with pacemakers.
- Your phone can interfere with electrical equipment such as answering machines, TV and radio sets, clock radios and computers if placed too close. It is recommended that you position the base unit at least one meter from such appliances.

**Caution**

Use only the mains adapter supplied with this telephone. Incorrect adapter polarity or voltage can seriously damage the unit.

- **Base adapter:**
  - Input: 100 V - 240 VAC 50/60 Hz
  - Output: 6 VDC 500 mA
- **Charger adapter:**
  - Input: 100 V - 240 VAC 50/60 Hz
  - Output: 6 VDC 210 mA

**Caution**

RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.

Never use non-rechargeable batteries; use recommended type supplied with this telephone. NiMH batteries must be disposed of in accordance with the applicable waste disposal regulations.

FCC CERTIFICATION NUMBER IS LOCATED ON THE CABINET BOTTOM

The term “IC:” before the certification number signifies that Industry Canada technical specifications were met. This certification means that the equipment
meets certain radio communications and operational requirements.

2.7 Equipment Approval Information
Your telephone equipment is approved for connection to the public switched telephone network and is in compliance with parts 15 and 68, FCC Rules and Regulations and the Technical Requirements for Telephone Terminal Equipment published by ACTA.

2.7.1 Notification to the Local Telephone Company
On the bottom of this equipment is a label indicating, among other information, the US number and Ringer Equivalence Number (REN) for the equipment. You must, upon request, provide this information to your telephone company. The REN is useful in determining the number of devices you may connect to your telephone line and still have all of these devices ring when your telephone number is called. In most (but not all) areas, the sum of the RENs of all devices connected to one line should not exceed 5. To be certain of the number of devices you may connect to your line as determined by the REN, you should contact your local telephone company. A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

Notes
• This equipment may not be used on coin service provided by the telephone company.
• Party lines are subject to state tariffs, and therefore, you may not be able to use your own telephone equipment if you are on a party line. Check with your local telephone company.
• Notice must be given to the telephone company upon permanent disconnection of your telephone from your line.
• If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this product does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

2.7.2 Rights of the Phone Company
Should your equipment cause trouble on your line which may harm the telephone network, the telephone company shall, where practicable, notify you that
temporary discontinuance of service may be required. Where prior notice is not practicable and the circumstances warrant such action, the telephone company may temporarily discontinue service immediately. In case of such temporary discontinuance, the telephone company must:
(1) promptly notify you of such temporary discontinuance; (2) afford you the opportunity to correct the situation; and (3) inform you of your right to bring a complaint to the Commission pursuant to procedures set forth in Subpart E of Part 68, FCC Rules and Regulations.

The telephone company may make changes in its communications facilities, equipment, operations or procedures where such action is required in the operation of its business and not inconsistent with FCC rules and Regulations. If these changes are expected to affect the use or performance of your telephone equipment, the telephone company must give you adequate notice, in writing, to allow you to maintain uninterrupted service.

### 2.8 Interference Information
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference; and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna (that is, the antenna for radio or television that is “receiving” the interference).
- Reorient or relocate and increase the separation between the telecommunications equipment and receiving antenna.
- Connect the telecommunications equipment into an outlet on a circuit different from that to which the receiving antenna is connected.

If these measures do not eliminate the interference, please consult your dealer or an experienced radio / television technician for additional suggestions. Also, the Federal Communications
Commission has prepared a helpful booklet, “How To Identify and Resolve Radio/TV Interference Problems”. This booklet is available from the U.S. Government Printing Office, Washington, D.C. 20402. Please specify stock number 004-000-00345-4 when ordering copies.

Notice: The changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

2.9 Hearing Aid Compatibility (HAC)
This telephone system meets FCC and Industry Canada standards for Hearing Aid Compatibility.

2.10 FCC RF Radiation Exposure Statement
This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. For hand held operation, this phone has been tested and meets the FCC RF exposure guidelines. Use of other accessories may not ensure compliance with FCC RF exposure guidelines.

3 Important
Take time to read this user manual before you use your phone. It contains important information and notes regarding your phone.

NOTICE: This product meets the applicable Industry Canada technical specifications. The equipment must be installed using an acceptable method of connection. The customer should be aware that compliance with the above conditions may not prevent degradation of service in some situations. Repairs to certified equipment should be made by an authorized Canadian maintenance facility designated by the supplier. Any repairs or alterations made by the user to this equipment, or equipment malfunctions, may give the telecommunications company cause to request the user to disconnect the equipment. Users should ensure for their own protection that the electrical ground connections of the power utility, telephone lines and internal metallic water pipe systems, if present, are connected together. This precaution may be particularly important in rural areas. CAUTION: Users should not attempt to make such connections themselves, but should contact the appropriate electric inspection authority, or electrician, as appropriate.
NOTES: This equipment may not be used on coin service provided by the telephone company.

3.1 Power requirements

- This product requires an electrical supply of 100-240 volts AC. In case of power failure, the communication can be lost.
- The Electrical network is classified as hazardous. The only way to power down the charger is to unplug the power supply from the electrical outlet. Ensure that the electrical outlet is always easily accessible.
- The voltage on the network is classified as TNV-3 (Telecommunication Network Voltages), as defined in the standard UL 60950.

⚠️ Warning

To avoid damage or malfunction:

- Do not allow the charging contacts or the battery to come into contact with metal objects.
- Do not open it as you could be exposed to high voltages.
- Do not allow the charger to come into contact with liquids.
- Never use any other battery than the one delivered with the product or recommended by Philips: risk of explosion.
- Always use the cables provided with the product.
- Handsfree activation could suddenly increase the volume in the earpiece to a very high level: make sure the handset is not too close to your ear.
- This equipment is not designed to make emergency calls when the power fails. An alternative has to be made available to allow emergency calls.
- Do not expose the phone to excessive heat caused by heating equipment or direct sunlight.
- Do not drop your phone or allow objects to fall on your phone.
- Do not use any cleaning agents containing alcohol, ammonia, benzene, or abrasives as these may harm the set.
- Do not use the product in places where there are explosive hazards.
- Do not let small metal objects come into contact with the product. This can deteriorate audio quality and damage the product.
- Active mobile phones in the vicinity may cause interference.

About operating and storage temperatures:

- Operate in a place where temperature is always between 0 and 35° C (32 to 95° F).
- Store in a place where temperature is always between -20 and 70° C (-4 to 158° F).
- Battery life may be shortened in low temperature conditions.
3.2 **Electric, Magnetic and Electromagnetic Fields (“EMF”)**

1. Philips Royal Electronics manufactures and sells many consumer oriented products which usually, as with any electronic apparatus, have the ability to emit and receive electromagnetic signals.

2. One of Philips’ leading Business Principles is to take all necessary health and safety precautions for our products, to comply with all applicable legal requirements and to stay well within the EMF standards applicable at the time of producing the products.

3. Philips is committed to develop, produce and market products that cause no adverse health effects.

4. Philips confirms that if its products are handled properly for their intended use, they are safe to use according to scientific evidence available today.

5. Philips plays an active role in the development of international EMF and safety standards, enabling Philips to anticipate further developments in standardisation for early integration in its products.

3.3 **Recycle your batteries**

Do not dispose your rechargeable batteries. Call the toll fee number 1-800-822-8837 to get instructions on how to recycle your batteries.

4 **The RBRC® seal**

The RBRC® Seal on the nickel metal hydride battery indicates that Philips Royal Electronics is voluntarily participating in an industry program to collect and recycle these batteries at the end of their useful lives, when taken out of service within the United States and Canada.

The RBRC® program provides a convenient alternative to placing used nickel metal hydride batteries into the trash or municipal waste, which may be illegal in your area.

Philips’s participation in RBRC® makes it easy for you to drop off the spent battery at local retailers participating in the RBRC® program or at authorized Philips product service centers.

Please call 1-800-8-BATTERY for information on Ni-MH battery recycling and disposal bans/restrictions in your area. Philips’s involvement in this program is part of its commitment to protecting our environment and conserving natural resources.

RBRC® is a registered trademark of Rechargeable Battery Recycling Corporation.

www.philips.com/welcome.

5.1 What’s in the box

- Handset with belt clip
- Base Station
- Battery door
- Bracket for wall mounting
- 2 AAA rechargeable batteries
- Power supply
- Line cords*
- User manual
- Guarantee
- Do not return leaflet
- Quick Start Guide

Note
* The black line cord is a 4-pin telephone line cord, and the gray line cord is a 2-pin telephone line cord. Use these as explained in 7.1 Connect the base station.
In multihandset packs, you will find one or more additional handsets, chargers with power supply units and additional rechargeable batteries.
5.2 Overview of your handset

A  Event LED
The event LED on your handset blinks when there is a new message recorded on your telephone answering machine. If you have subscribed to Caller Line Identification, the event LED also blinks when there is a new call, or a new voice mail message.

B  Earpiece

C  Display
See section 5.3 for an overview of the display icons.

D  Select key
Press to receive an incoming call on Line 1, or to select Line 1 for making an outgoing call.
In a menu, selects the function displayed on the screen or go to the next lower level. Also used to confirm entries (for example, when setting date and time).

E  Back/Clear key
Press to receive an incoming call on Line 2, or to select Line 2 for making an outgoing call.
When making an entry, press to clear (delete) a character or number, or long press to clear all.
When navigating menus, press to move to the previous higher menu level (Back is displayed).

F  Navigation keys
In idle mode: Scroll up \(\uparrow\) to access the Call log and scroll down \(\downarrow\) to access the Phonebook.
During a call: Scroll \(\uparrow\) to increase or decrease earpiece and speaker volume.
Editing and entry: Move to the previous character \(\uparrow\) or next character \(\downarrow\).
In other modes: Scroll up \(\uparrow\) and down \(\downarrow\) a menu list or go to the previous or next record in the Phonebook, Redial list, or Call log.

G  Talk key
In idle mode: Make or answer an external call on the default line, or answer an incoming internal call.
During a call: Activate the flash function.
In other modes: Dial the selected number in the Phonebook, Redial list, or Call log on the default line.
**H  Hang-up/Exit key**
In idle mode: Long press (5 seconds) to switch off the handset.
When the handset is switched off: Long press (1 second) to switch it on.
During a call: Hang up a call.
In other modes: Press to return to idle mode.

**I  Menu key**
In idle mode: Go to the main menu.

**J  Redial key**
Access the Redial list in idle mode.

**K  Loudspeaker key**
In idle mode: Turn on the loudspeaker and dial the number. Answer an incoming call on the default line using handsfree mode.
During a call: Toggle the loudspeaker on/off.

**L  Number keys**
Use to dial numbers and write characters. With key 1, a long press invites you to select a line, then dials your voice mail subscriber access number via the selected line. With keys 3 to 9, a long press invites you to select a line, then dials one of your direct memory access numbers via the selected line.

**M  */Keypad lock & Format key**
In idle mode: Long press to lock/ unlock keypad.
Predialling or editing: Press to enter a “*”.
Off hook: Long press to temporarily switch to tone (DTMF) dialling if using pulse.
During call log display: Toggles area code and long distance display on/off.

**N  #/Ringer on/off & Pause key**
In idle mode: Long press to turn the ringer on/off.

**Dialling or editing**: Long press to insert a pause (during predialling) and short press to insert a “#”.
**Editing**: Short press to switch upper/lower case.

**O  Mute key**
When off hook: Deactivate/activate the microphone.

**P  Call transfer key & Intercom key**
In idle mode: Initiate an internal call.
During a call: Short press to hold the line and page another handset. Long press to set up a conference between an external call and two handsets.

**Q  Microphone**

**R  Belt clip**

**S  Loudspeaker (underneath the belt clip)**

**Warning**
Handsfree activation can suddenly increase the volume of the earpiece to a
very high level. Make sure the handset is not too close to your ear.

T  Headset jack
U  Battery door
5.3 Display icons and Messages

Indicates that the battery is fully charged. This icon blinks during charge and when the battery is low.

When the icon is empty the battery is practically discharged.

**Note**

If Warning Batt flashes together with a blinking battery icon, batteries of the wrong type are installed in the handset. Replace with batteries of the correct type. Blinks when there is an incoming call. Steady On during a call.

If you subscribe to voice mail service, blinks when there is new voice mail.

Blinks when there are new and missed calls in the call log records.

Appears when the alarm clock is activated. Blinks when the alarm time comes.

Appears when the loudspeaker is activated.

Appears when the ringer is off.

Steady on when the answering machine is on. Blinks when messages have been received by the answering machine; blinks rapidly when answering machine memory is full.

Indicates that the handset is registered and within range of the base station. Icon blinks when the handset is out of range or is searching for a base.

Appears when using Line 1.

Appears when using Line 2.

**L1 IN USE**

Steady ON when another unit is using Line 1 (appears only in talk mode).

**L1 HOLD**

Steady on when Line 1 is on hold (appears only in talk mode).

**L1 CALL**

Steady on when there is a incoming call on Line 1 (appears only in talk mode).

**L2 IN USE**

Steady ON when another unit is using Line 2 (appears only in talk mode).
L2 HOLD
Steady on when Line 2 is on hold (appears only in talk mode).

L2 CALL
Steady on when there is an incoming call on Line 2 (appears only in talk mode).

Line 1/Select/OK
Line 1 selects Line 1.
Select appears when in menu mode. Press the key directly below to move to the next menu level or to confirm a selection.
OK appears to request confirmation of an operation. Press the key directly below to confirm.

Indicates that more options are available in a scroll list, or that you can adjust the volume.

Line 2/Back/Clear
Line 2 selects Line 2.
Back appears when in menu mode. Press the key directly below to return to the previous menu level.
Clear appears when making an entry. Press the key directly below to clear (delete) a character or number when making an entry. Long press to clear all.
5.4 Overview of the base station

A Handset locator key
Locate handset.
Long press more than 3 seconds to start the registration procedure.

B Display
See 5.5 for an overview of the display.

C Speaker

D Play/Stop key
Play phone messages (the first message recorded will be played first). After pressing this key, select Line 1 or Line 2 using the soft keys. Voice prompts are played between messages and when all messages have been played.

Stop message playback.

E Previous/Select Key
During message playback: Go to the previous message.
In menu mode: Select the function displayed on the screen or go to the next lower level in a menu.

F Call log/Up key
In idle mode: Enter the call log.
In menu mode: Scroll up in the list.

G Back/Clear Key
During message playback: Go to the next message.
In menu mode: Go to the previous level in a menu.

H Erase Key
During message playback: Short press to delete the current message.
In idle mode: Long press to delete all old messages. After long pressing this key, select Line 1 or Line 2 using the soft keys.

I Menu key
Enter/exit the main menu.

J Phonebook/Down key
In idle mode: Enter the phonebook.
In menu mode: Scroll down in the list.

K On/Off Key
Short press to switch the answering machine on/off. After pressing this key, select Line 1 or Line 2 using the soft keys.
The event LED on the base blinks during handset locating. It is steady on when a handset has taken the line.

**Volume Keys**

In idle mode: Increase or decrease the ring volume. Ring volume can be set separately for each of Line 1 and Line 2. During a conversation or during message playback: Increase or decrease the speaker volume.

**Speaker key**

In idle mode: Pick up the first open line with the speaker on. During a call: End the call. The speaker key LED blinks when receiving an incoming call. It is steady on when the base is in talk mode.

**Hold/Intercom key**

In idle mode: Initiate an internal call. During a call: End the call. The speaker key LED blinks when receiving an incoming call. It is steady on when the base is in talk mode.

**Mute key**

When off hook: Mute/Unmute the microphone.

**Redial key**

Access the Redial list.

**Flash/Call waiting**

Send a flash on the line. If there is an incoming call waiting, answer the call.

**Line 1 key**

In idle mode: Pick up Line 1 with the speaker on. During a call: Release Line 1. If there is a current call on Line 2, pick up Line 1 and put the call on hold on Line 2.

**Line 2 key**

In idle mode: Pick up Line 2 with the speaker on. During a call: Release Line 2. If there is a current call on Line 1, pick up Line 2 and put the call on hold on Line 1.

**Hash key**

Short press to enter a ‘#’. Long press to enter a pause.

**Star/format key**

Enter a ‘*’. When viewing the call log, press to change the number format. (See section11.1.1 - “To choose the format for call log display.”)

**Number keys**

Short press to dial numbers. Long press keys 3 def to 9 keys to dial a direct access memory number.

**DC IN 6V jack**

**TEL LINE 2 phone jack**

**TEL LINE 1/2 phone jack**

**Microphone (at the bottom front of the base station)**
5.5 Base station display

A Sub-screen display area
Shows answering machine status. See below.

B Main display area
In idle mode: Displays the time and date or new events.
In menu mode: Displays the options in the menu.

C Ringer Off Icon
Turns on when the ringer volume is set to zero. The small numerals “1” and “2” show which line(s) have ringer volume set to zero.

D L1 and L2 in Main Display Area
L1 is for Line 1 and L2 is for Line 2. These icons blink when the line is receiving a call.
They are steady on when:
• The line is off-hook.
• The line is in external talk mode.
• Viewing call log of the line.
• The line is in hold mode or in use by handset.
• The line is set to Call barring on.

E Soft keys
Soft key 1 is activated by the Select/OK key. Soft key 2 is activated by the Back/Clear key.

F Answering Machine Counters
Displays ☐ steady on when the answering machine of the line is set to off.
Displays “AA” steady on when the answering machine of the line is in handset remote control mode or auto answering mode.

G Message Counter
Shows the number of the messages in answering machine for the line. Blinks when there are new messages.
The FULL icon comes on when message memory of the line is full, but only when there are no new messages.

H L1 and L2 in the Sub-screen Display Area
L1 is for Line 1 and L2 is for Line 2. These icons appear at all times.

6 Conventions Used in this Manual

This manual uses the following conventions.
• **Bold text**
Bold text is used for messages and instructions that are shown on the handset or base display screen.
• **Handset and Base Station Keys**
Except where indicated otherwise, basic operation is the same for both the handset and base station of this product. However, for some functions the keys
used on the handset and base station have different shapes or different lettering.
The procedures in this manual use the handset key icons. This table shows the corresponding keys for the base station. Refer to it when needed.

<table>
<thead>
<tr>
<th>Key on Handset</th>
<th>Key on Base Station</th>
</tr>
</thead>
<tbody>
<tr>
<td>call ID</td>
<td>call ID</td>
</tr>
<tr>
<td>Ph.Book</td>
<td>Ph.Book</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>Left — key</td>
<td></td>
</tr>
<tr>
<td>Right — key</td>
<td></td>
</tr>
<tr>
<td>int</td>
<td>hold memory</td>
</tr>
<tr>
<td>* — key</td>
<td>*format</td>
</tr>
<tr>
<td>#</td>
<td></td>
</tr>
</tbody>
</table>

These keys are used to access the main menu and utilize functions such as redial and caller ID. For details, see 5.2 and 5.4.

- **Terminology**
  When a procedure applies equally to the handset and the base station, the word “unit” is used to indicate both.

- **Scrolling**
  “Scroll” means to use the call ID and Ph.Book keys on the handset or the * and # keys on the base station to scroll through a menu or list on the display screen.

**Note:** See Section 5 for detailed descriptions of the functions and use of the keys of the handset and base station.

7 Getting started

7.1 Connect the base station

1 Place the base station in a central location near the telephone line socket and electricity socket.
2 Connect the line cord(s) and the power cable to their corresponding connectors at the back of the base station.

**Note**
For 2 line subscriptions, connect the 4-pin telephone line cord (the black cord) to the black TEL LINE 1/2 phone jack and to the telephone wall jack for line 1.
Connect the second telephone line cord (the gray cord) to the gray TEL LINE 2 phone jack and to the telephone wall jack for line 2.
If the two phone lines are on one modular wall jack, connect only the 4-pin telephone line cord (the black cord) to the black TEL LINE 1/2 phone jack and to the telephone wall jack. (Do not connect anything to the gray TEL LINE 2 phone jack.)
3 Connect the other end of each of the line cords to its socket.
4 Connect the power cable to the power outlet.

Line adaptors may not be attached to the line cords. In this case, you have to connect line adaptors to the line cords first before plugging the line cords into the line sockets.

Note

Line adaptors may not be attached to the line cords. In this case, you have to connect line adaptors to the line cords first before plugging the line cords into the line sockets.

Warning
Avoid placing the base station too close to large metal objects such as filing cabinets, radiators or electrical appliances. This can impair the range and sound quality. Buildings with thick internal and external walls may impair transmission of signals to and from the base.

Warning
Power is applied when the power adaptor is plugged into the unit and connected to the electricity socket. The only way to power down the unit is to unplug the power adaptor from the electricity socket. Therefore, ensure that the electricity socket is easily accessible.

7.2 Wall mounting the base
The base is designed to support wall mounting. To wall mount the base, follow the instructions below.

1 Attach the bracket to the base station as shown below.

2 Use the pedestal wall mounting to plug your base station.
7.3 Install your phone
Before using the handset, the batteries have to be installed and fully charged.

⚠️ Warning
When the batteries are inserted for the first time, the unit will not be able to start normally due to the low battery. You must charge the batteries on the base station before you can use the handset.

7.3.1 Install battery
⚠️ Warning
Always use AAA rechargeable batteries supplied with your unit. If alkaline batteries are used instead of rechargeable batteries, “Warning Batt” will show on the display and the battery icon will blink quickly.

1. Slide out the battery cover.

2. Place the batteries in the correct polarity as indicated and replace the cover.

7.3.2 Charge battery
⚠️ Warning
The handset must be charged for at least 24 hours before using it for the first time. When the battery level becomes low, the low battery sensor warns you by blinking the battery icon. If this occurs during a conversation, an alert tone sounds to inform you that the battery is low. If the battery level becomes exceedingly low, the phone automatically switches off shortly after the icon starts blinking and any function in progress will not be saved.

1. Place the handset on the charging cradle of the base station. A beep is emitted if the handset is placed correctly.

2. The battery icon on the display blinks during charge.

3. The battery icon becomes steady when the handset is fully charged.

⏰ Note
Optimal battery life is reached after 3 cycles of complete charging (over 15
hours) and discharging, allowing approximately 12 hours of talk-time and 150 hours of stand-by time. The indoor and outdoor range of the phone is up to 50 metres and 300 metres respectively. When the handset moves beyond the operation range, the antenna icon $\mathcal{H}$ will blink.

**Tip**
When you reach the range limit the conversation may become crackly. Move closer to the base.

### 7.4 Remove/Attach belt clip
A belt clip allows you to carry your handset on your belt.

1. To remove the belt clip, simply pull the clip away from the handset.
2. To attach the belt clip to your handset, fit the tabs on the belt clip into the slots at the back of the handset and push into place.

### 7.5 Install optional headset
Your phone may be used with an optional headset (not included in the box). To use this feature, insert the headset plug into the headset jack. Your phone is ready for hands-free conversations.

### 7.6 Power up
On the base, the screen below is shown during power up.

The handset will start searching and the backlight will turn on.

Handset screen
The display will show the word “Searching” and Antenna icon flashing until it locks onto its subscribed base. Then the display shows the standby display.

### 7.7 Using multipacks
If you have purchased a multipack you will have additional handsets, chargers, power adaptors and AAA rechargeable batteries.

1. Plug the chargers into a power socket.
2. Install the batteries supplied into the handsets.
3. Place the handsets on the chargers to charge the batteries.
7.8  Handset menu structure
The SE659 has six menus as shown in the following table.

<table>
<thead>
<tr>
<th>Menu Name</th>
<th>Icon</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Phonebook</td>
<td></td>
</tr>
<tr>
<td>2 Personal Settings</td>
<td></td>
</tr>
<tr>
<td>3 Clock and Alarm</td>
<td></td>
</tr>
<tr>
<td>4 Advanced Settings</td>
<td></td>
</tr>
<tr>
<td>5 Network Services</td>
<td></td>
</tr>
<tr>
<td>6 Answer Machine</td>
<td></td>
</tr>
</tbody>
</table>

Press the menu key (menu) to enter menu mode. Use navigation keys (nav) to navigate within the menus and all submenus.

Press (Select) Select to enter the next lower menu level. Press (Back) Back to go to the previous menu level.

The charts below show the menu trees of your phone.

8 Using your phone

8.1 Make a call

8.1.1 Predialling

1 Enter the number. (A maximum of 24 digits including * and # are allowed. Press Clear to delete the last digit. Or long press to delete all.)

2 From the handset: Press dial. The line selection menu appears and the default line is highlighted. If you want to switch to the other line, scroll . To start the call, press dial or Select (or press to start in speaker mode).
   - The call is initiated on the highlighted line.

From the base: Press to call from the default line. When Auto is selected as the line setting, the base will automatically select a free line. To call from a particular line, press line 1 or line 2.
   - The call is initiated.

Note
For the line setting on the base station, see section 12.9.

8.1.2 Direct dialling

1 From the handset: Pick up the handset. To call from the default line, press dial (or press to start a call in speaker mode). To call from a particular line, press Line 1 or Line 2.

From the base: Press to call from the default line. To call from a particular line, press line 1 or line 2.

2 Dial the number.
   - The call is initiated.

Note
If Auto is selected as the line setting, the phone will automatically select a free line when you press or on the handset or on the base. For the line setting, see section 13.14 for the handset and section 12.9 for the base station.

8.1.3 Call from redial list

1 Press in idle mode.

2 Scroll to an entry in the redial list.

3 From the handset: Press dial. The line selection menu appears and the default line is highlighted. If you want to switch to the other line, scroll . To start the call, press dial or Select (or press to start in speaker mode).
   - The call is initiated.

From the base: Press to call from the default line. When Auto is selected as the line setting, the base will automatically select a free line. To call from a particular line, press line 1 or line 2.
   - The call is initiated.

Note
For the line setting on the base station, see section 12.9.

The handset(s) and base station each have their own redial list.
8.1.4 Call from the call log

Note
- The call log is shared between handset(s) and the base station.
- You need to subscribe to Caller Line Identification service to be able to see the caller's number or name in the call log. See section 11.1 - “Access the Call log”.

1. Press call ID in idle mode.

Note
If the list is already empty, then “List Empty” is displayed.

2. Scroll to an entry in the call list.

3. From the handset: Press dial. The line selection menu appears and the default line is highlighted. If you want to switch to the other line, scroll select. To start the call, press dial or Select (or press to start in speaker mode).
   - The call is initiated on the highlighted line.

From the base: Press speaker to call from the default line. When Auto is selected as the line setting, the base will automatically select a free line. To call from a particular line, press line 1 or line 2.
   - The call is initiated.

Note
For the line setting on the base station, see section 12.9.

8.1.5 Call from the phonebook

1. Press PhBook in idle mode.

2. Scroll to a phonebook entry.

3. From the handset: Press dial. The line selection menu appears and the default line is highlighted. If you want to switch to the other line, scroll select. To start the call, press dial or Select (or press to start in speaker mode).
   - The call is initiated on the highlighted line.

From the base: Press speaker to call from the default line. When Auto is selected as the line setting, the base will automatically select a free line. To call from a particular line, press line 1 or line 2.
   - The call is initiated.

Note
For the line setting on the base station, see section 12.9.

8.1.6 Call from the phonebook while already on the phone

1. While on the phone, press Option soft key and then select to enter the phonebook name list.

2. Scroll to a phonebook entry.

3. From the handset: To call from the default line, press dial (or press to start a call in speaker mode). To call from a particular line, press Line 1 or Line 2.

From the base: Press speaker to call from the default line. To call from a particular line, press line 1 or line 2.

Note
If Auto is selected as the line setting, the phone will automatically select a free line when you press dial or on the handset.
or **speaker** on the base. For the line setting, see section 13.14 for the handset and section 12.9 for the base station.

---

### 8.1.7 Call using Direct Access Memory

Press a number key 3 to 9 for more than 2 seconds. This invites you to select a line, then dials a stored direct access memory number on the desired line.

*Note*
- The handset(s) and base station each have their own direct access memories.
- See section 10.7 for instructions on how to store, edit, and delete direct access memory numbers.

---

### 8.1.8 Enter a Dialing Pause

Long press key **#** to enter a pause in the dialling sequence. The pause is indicated by a P.

---

### 8.2 Answer a call

**Danger**

When the handset rings during an incoming call, please do not hold the handset too close to your ear as the volume of the ringing tone may damage your hearing.

When the phone rings, the L1 (or L2) indicator and **L1 CALL** (or **L2 CALL**) icon appear to indicate the incoming call line. To answer, press the appropriate soft key on the handset ([**Line 1**](#) or [**Line 2**](#) on the base station.)

- The call is established.

*Note*
- When **Auto** is selected as the line setting, you can accept incoming calls on either line by pressing [**Line 1**](#) or [**Line 2**](#) on the handset, or [**speaker**](#) on the base station. When Line 1 or Line 2 is selected as the line setting, you can use these keys to accept calls on the selected line, but you must use the **Line 1** or **Line 2** soft keys on the handset or [**Line 1**](#)/[**Line 2**](#) on the base station to accept calls on the other line.
- Incoming call has priority over other events. Whenever there is an incoming call, other status in progress such as phone setting, menu navigation, etc will be aborted.

---

### 8.2.1 Handsfree answering with handset

**Danger**

Handsfree activation can suddenly increase the volume in the earpiece to a very high level. Make sure the handset is not too close to your ear.

When the phone rings, and current default line is the incoming call line, press [**ringer**](#) on the handset.

- The loudspeaker is activated on the handset.
8.3 Answer a call on the other line
You can put the current call on hold and accept an incoming call on the other line.

1 When there is an incoming call from the other line, the earpiece will emit a beep tone to inform you; press the other line key on the handset.
   • The call is established on the second line.

2 To switch back to the first caller, either hang up the second line, or place it on hold and press the first line key to resume talking with the first caller.

8.4 End a call
To end a conversation, press on the handset or key on the base.
   • The call ends.

Tip
When auto hang-up is on, you can simply place the handset back to its base station or charger to end the call. This feature is activated by default.

Note
The call duration (MM:SS) will be displayed on the handset screen for about 5 seconds.

8.5 Using the Redial list
The redial list stores the last 10 numbers dialed. A maximum of 32 digits can be displayed for each entry.

8.5.1 Access Redial list
1 Press to go to the redial list and scroll to browse the redial list.
   • The last number dialed will appear first in the redial list. If the redial number matches a phonebook entry, the name will be displayed instead.

2 To open the redial list options, press Menu.

Note
Press Back to return to the previous menu.

8.5.2 View redial number details
1 Press in idle mode, scroll to select an entry and press Menu.

2 View is highlighted on the screen; press Select to display information about the number dialed.

3 Press Next to display further information. Afterward, you can press Prev. to return to the former screen. After viewing, press Back to return to previous menu levels.

8.5.3 Save a redial number into the phonebook
1 Press in idle mode, scroll to select an entry and press Menu.

2 View is highlighted on the screen. Scroll to Save Number and press Select.
3 **Enter Name** is displayed. Enter the name of the contact (maximum 14 characters) and press OK.

4 **Enter Number** is displayed and the selected number from the redial list appears in the number field. At this time you can edit the number if you wish to.

5 Press OK. The screen returns to the redial list.

Note
Press Clear to delete the last digit or character entered. Long press Clear to clear the entire entry.

### 8.5.4 Delete a redial number

1 Press in idle mode, scroll to select an entry and press Menu.
2 Scroll to Delete and press Select.
3 Delete? is displayed on the screen.
4 Press OK to confirm deletion.
   - A validation tone is emitted.

Note
Press Back to discard the deletion. The screen returns to the redial list.

### 8.5.5 Delete all redial numbers

1 Press in idle mode, and press Menu
2 Scroll to Delete All and press Select.
3 Delete All? is displayed on the screen.
4 Press OK to confirm deletion.
   - A validation tone is emitted.
9 Use more of your phone

9.1 Switch the handset off/on
To switch the handset off, press and hold "*" in idle mode for at least 5 seconds. To switch it on, press and hold "#" for at least one second.

9.2 Handset keypad lock/unlock
Press and hold "*" for 3 seconds to lock/unlock the keypad in idle mode.

9.3 Text or number entry
When you select a field in which you can enter text, you can enter the letters that are printed on the keys by pressing the relevant key once or several times. For example, to enter the name “PAUL”:
1. Press 7 once: P
2. Press 2 once: PA
3. Press 8 twice: PAU
4. Press 5 three times: PAUL

The table below gives you the character assignment during text or number entry:

<table>
<thead>
<tr>
<th>Keys</th>
<th>Assigned characters</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>. , / ; ‘ ’ ‘ ? ‘ * ‘ + ‘ - ‘ % ‘ \ ‘ ^ ‘ ~ ‘</td>
</tr>
<tr>
<td>1</td>
<td>SPACE 1 @ _ # = &lt; &gt; ( ) &amp; € £ $ ¥ [ ] { } □ § ...</td>
</tr>
<tr>
<td>2</td>
<td>a b c 2 â æ á ä å ç</td>
</tr>
<tr>
<td>3</td>
<td>d e f 3 è é ê è ë Δ Ø</td>
</tr>
<tr>
<td>4</td>
<td>g h i 4 ġ ğ ĩ ĩ i i i i</td>
</tr>
<tr>
<td>5</td>
<td>j k l 5 Ω Ξ Ψ</td>
</tr>
</tbody>
</table>

Tip
- Press "Clear" to delete the last digit or character entered or long press to delete all.
- Short press "#" to shift between lowercase and uppercase.
- Long press "#" to insert a pause.

9.4 Call waiting
If you have subscribed to Call Waiting services, the earpiece will emit a beep tone to inform you that there is a second incoming call on the line you are currently using. The number or name of the second caller will also be displayed if you have subscribed to Caller Line Identification service (CLI). Please contact your network provider for more information on this service.

To hold the call in progress and answer the new call:
- From the handset, press "Accept" or "HOLD".
- From the base station, press "Accept" or "Sub call wait".

9.5 Call in progress
Some options are available to you during a call. The available options are:
9.5.1 Adjust earpiece or speaker volume

9.5.1.1 Earpiece or Speaker volume in handset
During a call, press \( \text{Call ID} \) and \( \text{Ph.Book} \) to select the volume level.
- The earpiece/speaker volume will be displayed as volume bar (level 1 to 5). The selected volume is saved for the next call.

9.5.1.2 Speaker volume in base
During a call, press \( \text{+} \) and \( \text{-} \) to select the volume level.
- The speaker volume will be displayed as volume bar (level 1 to 5). The selected volume is saved for the next call.

9.5.2 Mute/Unmute microphone
When the microphone is muted, your correspondent cannot hear you.
1. During a call, press \( \text{mute} \) to turn off the microphone.
2. Press \( \text{mute} \) again to turn on the microphone.

9.5.3 Activate/Deactivate handset loudspeaker mode

**Danger**
Handsfree activation can suddenly increase the volume in the earpiece to a very high level. Make sure the handset is not too close to your ear.

1. During a call, press \( \text{Loudsp} \) on the handset to activate the loudspeaker mode.
2. Press \( \text{Loudsp} \) again to return to deactivate the loudspeaker mode.

9.6 Chain dialing
This feature allows you to dial an extension to a number already saved in the phonebook during a call.
1. Press \( \text{Handset} \) or \( \text{Speaker} \) on the handset, or press \( \text{Speaker} \) on the base to take the default line. Then press \( \text{Option} \) soft key and \( \text{Select} \) to enter the phonebook list.
2. Scroll \( \text{Next} \) to a phonebook entry.
3. Press \( \text{Select} \).
- The first part is dialed.
4. Enter the extension.

9.7 Using the Intercom
The intercom feature allows you to make free internal calls, transfer external calls from one unit to another and use the conference option.

9.7.1 Intercom another unit

**Note**
If the handset does not belong to this model’s series, this function may not be available.
1. Press \( \text{Int} \) in idle mode.
- Intercom between the base and the handset is established immediately if there is only one handset registered to the base.
2 If there is more than 1 registered handset, scroll \( \text{to select the unit to call and press } \) \( \text{Select} \).
   - Once the intercom call is initiated the \( \text{icon is displayed on the handset.} \)

3 Press \( \text{to answer an intercom call on the called handset, or } \) \( \text{to answer on the base.} \)
   - The intercom is established.

\( \text{Note} \)
Pressing \( \text{on any handset or } \) \( \text{on the base will exit intercom mode and return other units to idle mode. If an external call arrives during intercom mode and you want to accept this call, you must first exit intercom mode.} \)

9.7.2 Transfer an external call to another unit

1 During the call, press \( \text{to put the external call on hold (the caller can no longer hear you).} \)
   - The display shows the numbers of the handsets registered to the base and the base as well if you are looking at the display on a handset.

2 Scroll \( \text{to the unit you wish to transfer your external call to and press } \) \( \text{Select} \).

3 Press \( \text{on the called unit to answer the internal call, where both internal callers can talk.} \)
   - Intercom is established.

4 Press \( \text{on the first unit to transfer the external call to the called handset.} \)

- The external call is transferred.

\( \text{Note} \)
If there is no answer from the called unit, press \( \text{to resume the external call.} \)

9.7.3 Answer an external call during intercom

1 During intercom, a new call tone is emitted when there is an incoming external call.

2 Press \( \text{ } \) \( \text{on the base) to exit intercom mode.} \)

3 To pick up the external call, press \( \text{Line 1 / } \) \( \text{Line 2 on the handset or } \) \( \text{on the base station.} \)

9.7.4 Switch between an internal and external call

During the call, press \( \text{to switch between an internal or external call.} \)

9.7.5 Establish a three-party conference call

The conference call feature allows an external call to be shared with two handsets, one handset and another external call, or one handset and the base. The three parties can share the conversation and no network subscription is required.
9.7.5.1 Conferencing between two internal units and an external line

1. During the call, press \texttt{int} to put the external call on hold (the caller can no longer hear you).
   - The display shows the numbers of available units (base or handsets).
2. Scroll \texttt{\textup{\textrightarrow}} to the number of the unit you wish to establish the conference call with and press \texttt{\textrightarrow Select}.
3. Press \texttt{\textup{\textrightarrow}} on the called handset or \texttt{\textup{\textrightarrow speaker}} on the base to answer the internal call, where both internal callers can talk.
   - Intercom is established.
4. Press \texttt{Conf.} soft key or long press \texttt{int} on the first unit to start the three party conference.
   - \texttt{Conference} will be displayed on the screen once the conference call is established.

Conf. will be displayed on the screen once the conference call is established.

To disconnect a single caller, press the corresponding line key (\texttt{Line 1} or \texttt{Line 2} soft key on the handset, or \texttt{line 1} or \texttt{line 2} on the base station) to place the caller you wish to keep speaking to on hold, and then press \texttt{\textup{\textrightarrow hold}} key on the handset or \texttt{\textup{\textrightarrow speaker}} on the base to hang up the other caller. Then press the other line soft key to take the remaining call off hold and continue the conversation.

To hang up both lines, press \texttt{\textup{\textrightarrow handset}} key on the handset or \texttt{\textup{\textrightarrow speaker}} on the base station.

9.7.5.2 Conferencing between one internal unit and two external lines

1. During a call, press the line key (\texttt{Line 1} or \texttt{Line 2} soft key on the handset, or \texttt{line 1} or \texttt{line 2} on the base station) for a free line to make or answer a second external call and put the first external call on hold (the caller can no longer hear you).
2. When the second call is connected, press \texttt{Option} soft key, scroll \texttt{\textup{\textrightarrow}} to \texttt{Conference}, and press \texttt{\textrightarrow Select} to initiate the conference call.
   - Conference will be displayed on the screen once the conference call is established.
3. To disconnect a single caller, press the corresponding line key (\texttt{Line 1} or \texttt{Line 2} soft key on the handset, or \texttt{line 1} or \texttt{line 2} on the base station) to place the caller you wish to keep speaking to on hold, and then press \texttt{\textup{\textrightarrow hold}} key on the handset or \texttt{\textup{\textrightarrow speaker}} on the base to hang up the other caller. Then press the other line soft key to take the remaining call off hold and continue the conversation.

To hang up both lines, press \texttt{\textup{\textrightarrow handset}} key on the handset or \texttt{\textup{\textrightarrow speaker}} on the base station.

9.8 Locate Handset

This feature enables you to locate a missing handset if the handset is in range and contains charged batteries.

1. Press \texttt{\textrightarrow} on the base station.
   - All the registered handsets start to ring.
   - Once a handset is found, press \texttt{\textup{\textrightarrow silent}} on a handset to stop its ringing.
2. Press \texttt{\textrightarrow} again to end the paging.

\textbf{Note}

If there are no key presses within 30 seconds, the handset and base station will automatically return to idle mode.
9.9 Clock and Alarm settings
This feature allows you to set the date, time and alarm settings for your phone.

Note
The alarm feature is available only on the handset.
The procedures in this section refer you to the Clock & Alarm menu. However if you access this menu from the base station, the menu name is “Clock”.

9.9.1 Set Date and Time
1 Press \( \text{menu} \) in idle mode, scroll \( \rightarrow \) to Clock & Alarm (Clock on the base), and press \( \text{Select} \).
2 Set Date/Time is highlighted. Press \( \text{Select} \).
3 The last stored date and time are displayed. Enter the current time and current date (HH:MM DD/MM/YY). Press \( \text{calld} \) to move the cursor left, or press \( \text{Ph.Book} \) to move it right. If using the 12 hour format, just after setting the minutes, use \( \text{time} \) to switch between AM and PM.
4 Press \( \text{OK} \).
   • A validation tone is emitted and the screen returns to the idle mode.

Note
You can change the format as shown in the next section.

9.9.2 Set Time and Date Format

9.9.2.1 Set Time Format
1 Press \( \text{menu} \) in idle mode, scroll \( \rightarrow \) to Clock & Alarm (Clock on the base), and press \( \text{Select} \).
2 Scroll \( \rightarrow \) to Set Format and press \( \text{Select} \).
3 Time Format is highlighted in the display. Press \( \text{Select} \), then scroll \( \rightarrow \) to select 12Hours or 24Hours.
4 Press \( \text{Select} \) to select the option.
   • A validation tone is emitted and the screen returns to the Set Format menu.

9.9.2.2 Set Date Format
1 Press \( \text{menu} \) in idle mode, scroll \( \rightarrow \) to Clock & Alarm (Clock on the base), and press \( \text{Select} \).
2 Scroll \( \rightarrow \) to Set Format and press \( \text{Select} \).
3 Scroll \( \rightarrow \) to Date Format and press \( \text{Select} \).
4 Scroll \( \rightarrow \) to select DD/MM or MM/DD and press \( \text{Select} \) to select the option.
   • A validation tone is emitted and the screen returns to the Set Format menu.

9.9.3 Set Alarm (Handset only)
1 Press \( \text{menu} \) in idle mode, scroll \( \rightarrow \) to Clock & Alarm, and press \( \text{Select} \).
2 Scroll to **Alarm** and press **Select**.

3 Scroll to **Off, On Once, or On Daily** and press **Select**.

4 If you select **On Once** or **On Daily**, enter the time (HH-MM) for the alarm. (If using the 12 hour format, you can switch between AM and PM by pressing * key.) Press **OK** to confirm.
   - A validation tone is emitted and the screen returns to the **Alarm** menu. And the alarm icon ☑ is displayed.
   - If you select **Off**, a validation tone is emitted and the screen returns to the **Clock & Alarm** menu.

**Note**
The alarm tone and alarm icon will sound/blink for 1 minute when the alarm time is reached. To mute the alarm tone, simply press any key on the handset.

9.9.4 **Set Alarm Tone (Handset only)**

1 Press **menu** in idle mode, scroll to **Clock & Alarm**, and press **Select**.

2 Scroll to **Alarm Tone** and press **Select**.

3 Scroll to select the tone. (Three tones are available. The tones sound as you scroll.) Press **Select** to confirm your selection.
   - A validation tone is emitted and the screen returns to the **Clock & Alarm** menu.

**10 Using your Phonebook**

Your phone can store up to 200 phonebook entries. Each phonebook entry can have a maximum of 24 digits for the phone number and 14 characters for the name.

All names and numbers in the phonebook must be unique.

**Note**
Only one unit (handset or base station) can access the phonebook at a time.

10.1 **Store a contact in the phonebook**

1 Press **menu** in idle mode. **Phonebook** is highlighted. Press **Select**.

2 **New Entry** is highlighted. Press **Select**.

3 **Enter Name** is displayed. Enter the name of the contact (maximum 14 characters) and press **OK**.

4 **Enter Number** is displayed. Enter the number (maximum 24 digits) and press **OK**.
   - A validation tone is emitted.

**Note**
- Press **Clear** to delete the last digit or character entered or long press to delete all.
- To return to the previous menu, press **Back**.
You cannot store a new phonebook entry when the memory is full. In this case, you have to delete existing entries to make space for new entries.

10.2 Access phonebook

1 Press \( \text{Ph.Book} \) in idle mode and scroll to browse the phonebook. (You can also access the phonebook through the menu mode. \( \text{menu} \to \text{Phonebook} \to \text{List} \))

- The phonebook entries will be listed in alphabetical order.

2 To view the details, press \( \text{View} \).

Tip

Instead of scrolling to browse the phonebook entries, you can press the numeric key corresponding to the first letter of the entry you wish to locate. For example, pressing \( 2 \) will show the entries starting with A. Pressing \( 2 \) again will show the entries starting with B, etc.

3 Press \( \text{menu} \) (or \( \text{speaker} \) on the base station) to dial the number. To return to idle mode press \( \text{menu} \) (or \( \text{speaker} \) on the base station).

10.3 Modify a phonebook entry

1 Press \( \text{menu} \) in idle mode. \text{Phonebook} is highlighted. Press \( \text{Select} \).

2 Scroll \( \) to \text{Edit Entry} and press \( \text{Select} \).

3 Scroll \( \) to select an entry to edit.

4 Press \( \text{Select} \) to display the name.

5 Press \( \text{Clear} \) to erase the letters one by one.

6 Edit the name and press \( \text{OK} \) to confirm.

7 Edit the number and press \( \text{OK} \) to confirm.

- A validation tone is emitted.

Note

While editing, press \( \text{Clear} \) to delete the last digit or character entered or long press to delete all.

10.4 Select phonebook melody

(Handset only)

With this function you can personalize the melody played when someone in the phonebook calls you.

Note

You need to subscribe to Caller Line Identification service to be able to benefit from this feature.

1 Press \( \text{menu} \) in idle mode. \text{Phonebook} is highlighted. Press \( \text{Select} \).

2 Scroll \( \) to \text{Select Melody} and press \( \text{Select} \).

3 Scroll \( \) to the entry you want to select a melody for, then press \( \text{View} \).

4 The screen shows the melody currently selected for that entry. Press \( \text{Change} \) to change the melody.

5 Scroll \( \) the list of melodies. (There are 15 melodies plus \text{No Melody} to choose from. The melodies play as you scroll through them.)

6 Press \( \text{Select} \) to select the melody you prefer.
10.5 Delete a phonebook entry
1 Press menu in idle mode. Phonebook is highlighted. Press Select.
2 Scroll to Delete and press Select.
3 Scroll to select an entry to delete and press Select.
4 Delete? is displayed on the screen. Press OK to confirm deletion.
   • A validation tone is emitted.

Note
Press Back to discard the deletion. The screen returns to the phonebook list.

10.6 Delete all phonebook entries
1 Press menu in idle mode. Phonebook is highlighted. Press Select.
2 Scroll to Delete All and press Select.
3 Delete All? is displayed on the screen. Press OK to confirm deletion.
   • A validation tone is emitted.

10.7 Direct Access Memory
There are 7 direct access memories (corresponding to keys 3 to 9) included in the phonebook. A long press on any of these keys in idle mode invites you to select a line, then dials the phone number stored in the corresponding direct access memory.

Note
Key 1 is reserved for use with Voicemail in the network services menu. If you subscribe to this service, this allows you to dial your voice mail access number using key 1.

10.7.1 Add/Edit Direct Access Memory
1 Press menu in idle mode. Phonebook is highlighted. Press Select.
2 Scroll to Direct Memory and press Select.
3 Handset: Scroll to the key you wish to edit (Key 3 to Key 9) and press Select.
Base: Scroll u or d to the key you wish to edit (Key 3 to Key 9) and press Select soft key.
   • The current number stored in the direct access memory location will be displayed. If no number is stored, No number will be displayed.
4 Press Menu. Edit is highlighted; press Select.
5 The Phonebook list will be displayed. Scroll to the Phonebook entry you wish to store in the selected direct access
memory number and press Select.
6 Press OK to confirm.
   • A validation tone is emitted and the screen returns to the previous menu.

10.7.2 Delete Direct Access Memory
1 Press menu in idle mode. Phonebook is highlighted. Press Select.
2 Scroll to Direct Memory and press Select.
3 Handset: Scroll to the key you wish to delete the memory from.
   Base: Scroll ↑ or ↓ to the key you wish to delete the memory from and press Select.
4 Press Menu, and then scroll to Delete and press Select.
   • A validation tone is emitted and the screen returns to the previous menu.

Note
If the identity of the caller is withheld, then the information will not be displayed in the call log. If you have not subscribed to Caller Line Identification service, there will not be any caller information displayed in the call log.

11.1 Access the Call log
1 Press call ID in idle mode, and scroll to browse the call log.
   • The calls (missed and received) are displayed in chronological order with the most recent call at the top of the list. L1 or L2 indicates the line on which the call was received. If the call is unviewed and unanswered, New appears on the display. After you view the message, New disappears.
   • Press to dial out the number of the selected call log entry.
2 To view the call details, press Menu and then press Select.
   The display shows the caller information.
   • Press Back at any time to return to the previous menu.

11 Using the Call log

The call log stores the last 50 external calls and any new voice mail received. In idle mode, New Call(s) appears on the handset or base display for new and unanswered calls. If you have subscribed to Caller Line Identification (CLI), and provided the identity of the caller is not withheld, the name (or number) of the caller will be displayed.
During CLI display, you can press * to toggle area code and long distance code display on/off.

Note
If the identity of the caller is withheld, then the information will not be displayed in the call log. If you have not subscribed to Caller Line Identification service, there will not be any caller information displayed in the call log.

Using the Call log
11.1.1 To choose the format for call log display
You must choose the correct format to dial the area code and number of the call log record chosen. The original incoming number from the call log will appear as a 7, 10 or 11-digit number.

1 When viewing the call log, press \* to change the format of the call log display as it should be dialed from your location. For example, if the call log entry appears as “234-567-8900”:
   • Press \* once to display “1-234-567-8900”
   • Press \* twice to display “567-8900”
   • Press \* 3 times to display “1-567-8900”
   • Press \* 4 times to display “234-567-8900” again.

2 To dial the current displayed number, press \# (or \* on the base station).
   • The call is initiated.

Note
You need to subscribe to Caller Line Identification service to be able to see the caller’s number or name in the call log (see section 11.1 - “Access the Call log”).

When you store an incoming number in the phonebook, the digits of the number will be saved exactly as they appear on the screen.

If the first 3 digits of the incoming number corresponds to the local area code set in your phone, they will be filtered automatically when you press the \# or \* on the handset (or \* on the base station) to dial. To change the local area code, see section 13.9 - “Set Area Code.”

11.2 Save call list entry into the phonebook

1 Press \* in idle mode, then scroll \# to select an entry and press \* Menu.
2 Scroll \# to Save Number and press \* Select.
3 Enter Name is displayed on the screen. Enter the name of the contact (maximum 14 characters) and press \* OK.
4 Enter Number is displayed and the selected number from the call list appears in the number field. At this time you can edit the number if you wish to.
5 Press \* OK.
   • A confirmation tone sounds and the screen returns to call log.

Note
Press \# Clear to delete the last digit or character entered or long press to delete all.

11.3 Delete a call list entry

1 Press \* in idle mode, then scroll \# to select an entry and press \* Menu.
2 Scroll \# to Delete and press \* Select.
3 Delete? is displayed on the screen. Press \* OK to confirm deletion.
• A validation tone is emitted, the call list entry is deleted, and the display goes to the next entry in the call list.

[Note]
Press Back to discard the deletion. The screen returns to the Call List menu.

11.4 Delete all call list entries

1. Press call ID in idle mode, then press Menu.
2. Scroll to Delete All and press Select.
3. Delete All? is displayed on the screen. Press OK to confirm deletion.
   • A validation tone is emitted. The display shows List Empty for 2 seconds and returns to the idle mode.

12 Personal settings

12.1 Change the Handset Name (Handset only)
You can name the handset and display the handset name in idle mode. The default handset name of your handset is Philips.

1. Press menu in idle mode, scroll to Personal Set and press Select.
2. Handset Name is highlighted. Press Select.
3. The last stored name is displayed. Press Clear to delete the characters one by one or a long press to delete all.
4. Enter the new name and press OK to confirm.
   • A validation tone is emitted and the screen returns to the Personal Set menu.

12.2 Ring Settings

12.2.1 Set the Ring Volume

[Warning]
Danger
When the handset rings during an incoming call, please do not hold the handset too close to your ear as the volume of the ringing tone may damage your hearing.

You can set the ring volume independently for each registered handset, as well as the base station. Handsets have 5 ringer volume levels, plus progressive and off. The base station has 5 ringer volume levels plus off. The default setting for both handsets and the base station is level 3.

To adjust ring volume on the handset:

1. Press menu in idle mode, scroll to Personal Set, and press Select.
2. Scroll to Handset Tones and press Select. Ring Volume is highlighted. Press Select.
3 Scroll \( \uparrow \) to select **Line 1** or **Line 2** and press \( \rightarrow \) **Select**.

4 Scroll \( \uparrow \) to your desired volume level. The ring tone sounds at each level.

5 Press \( \rightarrow \) **OK** to confirm.
   - A validation tone is emitted and the screen returns to the **Handset Tones** menu.

To adjust ring volume on the base station:
1 Press \( \uparrow \) or \( \downarrow \) in idle mode; **Select line** appears.
2 Press \( \rightarrow \) **Line 1** or \( \leftarrow \) **Line 2** to select the line whose ring volume is being adjusted.
3 Press \( \uparrow \) or \( \downarrow \) to adjust the ring volume on the selected line.

\( \text{Note} \)
If ring volume is set to off, the \( \uparrow \) icon will be displayed on the screen.
If ring volume is set to progressive (handset only), the ringer will start at level 1 and go up one level volume every ring.

**12.2.2 Set the Ring Tones**
There are 15 ring tones available on your handset, and 5 ring tones available for the base.
1 Press \( \text{menu} \) in idle mode, scroll \( \uparrow \) to **Personal Set**, and press \( \rightarrow \) **Select**.
2 Scroll \( \uparrow \) to **Handset Tones** on the handset or **Base Tones** on the base and press \( \rightarrow \) **Select**. Then scroll \( \uparrow \) to **Ring Tones** and press \( \rightarrow \) **Select**.
3 Scroll \( \uparrow \) to select **Line 1** or **Line 2** and press \( \rightarrow \) **Select**.
4 Scroll \( \uparrow \) to your desired melody. The melodies will play as you scroll them.
5 Press \( \rightarrow \) **Select** to set the ring tone.
   - A validation tone is emitted and the screen returns to the previous menu.

**12.2.3 Activate/Deactivate Key Beep**
A single beep tone is emitted when a key is pressed. You can enable or disable the key beep.
1 Press \( \text{menu} \) in idle mode, scroll \( \uparrow \) to **Personal Set**, and press \( \rightarrow \) **Select**.
2 Scroll \( \uparrow \) to **Handset Tones** on the handset or to **Base Tones** on the base and press \( \rightarrow \) **Select**. Then scroll \( \uparrow \) to **Key Beep** and press \( \rightarrow \) **Select**.
3 Scroll \( \uparrow \) to select **On** or **Off** and press \( \rightarrow \) **Select** to confirm.
   - A validation tone is emitted and the screen returns to the previous menu.

**12.3 Change the Display Language**
Your handset and base can support different display languages.
12.5 Select the Color Theme (Handset only)
There are 4 color themes available on your handset.

1. Press \( \text{menu} \) in idle mode, scroll \( \uparrow \) to \textbf{Personal Set}, and press \( \rightarrow \) \textbf{Select}.
2. Scroll \( \uparrow \) to \textbf{Color Theme} and press \( \rightarrow \) \textbf{Select}.
3. Scroll \( \uparrow \) to your desired color theme. The color theme used on the display will change as you scroll.
4. Press \( \rightarrow \) \textbf{Select} to confirm.

- A validation tone is emitted and the screen returns to the \textbf{Personal Set} menu.

\textbf{Note}
Once the display language is set, the option menus on the unit will immediately switch to display in the selected language.

12.6 Set the Display Contrast
You can change the contrast of the text on the display. There are 5 contrast levels available. The default is level 3.

1. Press \( \text{menu} \) in idle mode, scroll \( \uparrow \) to \textbf{Personal Set}, and press \( \rightarrow \) \textbf{Select}.
2. Scroll \( \uparrow \) to \textbf{Contrast} and press \( \rightarrow \) \textbf{Select}.
3. Scroll \( \uparrow \) to the desired display contrast, and press \( \rightarrow \) \textbf{Select} to confirm.

- A validation tone is emitted and the screen returns to the \textbf{Personal Set} menu.
12.7 Set the Backlight Time  
(Handset only)
You can change the backlight timing for the display. There are 3 options available - 20, 40, or 60 seconds.

1. Press ` in idle mode, scroll  to Personal Set, and press  Select.
2. Scroll  to Backlight Time and press  Select.
3. Scroll  to the desired backlight time, and press  Select to confirm.
   • A validation tone is emitted and the screen returns to the Personal Set menu.

12.8 Deactivate/Activate Auto Hang-Up (Handset only)
If auto hang-up is set to On, it will automatically release the line when the phone is put back on the cradle.
If auto Hang-up is set to Off, putting the handset back on the cradle while in talk mode will switch the handset to hands free talk mode. This allows you to charge the handset during calls.
The default setting for auto hang up is On.

1. Press ` in idle mode, scroll  to Personal Set, and press  Select.
2. Scroll  to Auto Hang-up and press  Select.
3. Scroll  to On or Off and press  Select to confirm.
   • A validation tone is emitted and the screen returns to the Personal Set menu.

12.9 Changing the Line Setting  
(Base Station only)
Note
See section 13.14 for how to change the line setting from the handset.

If you have two telephone lines connected to the base unit, the line setting determines how the lines are selected when making or receiving calls.
When “auto” is selected as the line setting, pressing  automatically connects the line that is currently free when making outgoing calls, or the line that is ringing when receiving an incoming call. (If both lines are in the same state, line 1 takes priority.) If Auto Conference is activated, pressing  lets the base station join a conversation between the external call on line 1 and another unit.

If Line 1 or Line 2 is selected as default and the corresponding line is free, pressing  automatically connects to that line when making outgoing calls, or when receiving an incoming call on that line. If Auto Conference is activated, pressing  lets the base station join a conversation on the selected line between an external caller and another unit.

1. Press `in idle mode, scroll  to Personal Set and press Select soft key.
2. Scroll  to Line Setting and press Select soft key.
3. Scroll  to select Auto, Line 1, or Line 2 and press Select soft key.
• A validation tone is emitted and the screen returns to the Personal Set menu.

13 Advanced settings

These settings can be made from any registered SE659 handset. They cannot be made from the base station.

13.1 Easy Call
When activated, this feature allows you to dial a preset number by pressing any key on the handset (except Cancel). This feature is useful for fast access to emergency services.

13.1.1 Set Easy Call to On or Off
Follow this procedure to switch Easy Call on. To switch Easy Call off, see the Note at the end of this section.

1. Press in idle mode, scroll to Advanced Set and press Select.
2. Easy Call is highlighted. Press Select to enter the Easy Call menu.
3. Mode is highlighted in the display. Press Select again to select Mode, then scroll to On.
4. Press Select to confirm the selection.

• If an Easy Call number has not been set, you will be prompted to input the Easy Call number.
• If an Easy call number has already been set, the screen returns to idle mode. If you want to edit the number, press Cancel and scroll to Number and press Select, edit the new number and press OK.

Note
When you switch Easy Call on, Easy Call On will be displayed on your screen in standby mode. You can still answer any incoming call as normal. To switch Easy Call off from idle mode, press Cancel. Mode is highlighted in the display. Press Select again to select Mode, and then scroll to Off. Press Select to confirm.

13.1.2 Set Easy Call number

1. Press in idle mode, scroll to Advanced Set and press Select.
2. Easy Call is highlighted in the display. Press Select to enter the Easy Call menu.
3. Mode is highlighted in the display. Scroll to Number and press Select.
4. Input the Easy Call number.
5. Press OK to confirm.

• A validation tone is emitted and the screen returns to the Easy Call menu.
13.2 Auto Conference
If activated, this feature allows another handset to join a conversation with an external call by simply pressing \( \text{Talk} \). The default setting is \textit{On}.
1. Press \( \text{menu} \) in idle mode, scroll \( \text{to} \) \textbf{Advanced Set} and press \( \text{Select} \).
2. Scroll \( \text{to} \) \textbf{Conference} and press \( \text{Select} \).
3. Scroll \( \text{to} \) select \textit{On} or \textit{Off} and press \( \text{Select} \) to confirm.
   - A validation tone is emitted and the screen returns to the \textbf{Advanced Set} menu.

13.3 Call Barring
If activated, this function prevents dialing out to numbers beginning with designated barring numbers. This is useful for preventing outgoing long distance calls or calls to specific prefixes. You can store up to four numbers, each with up to 4 digits.

\textbf{Note}
If you switch call barring on, \textbf{Call Barring} \textit{On} is displayed on the screen in idle mode. By default call barring is off.

13.3.1 Set Call Barring Mode
By default, Call Barring is \textit{OFF}.
1. Press \( \text{menu} \) in idle mode, scroll \( \text{to} \) \textbf{Advanced Set} and press \( \text{Select} \).
2. Scroll \( \text{to} \) \textbf{Call Barring} and press \( \text{Select} \).

13.3.2 Set a Call Barring number
1. Press \( \text{menu} \) in idle mode, scroll \( \text{to} \) \textbf{Advanced Set} and press \( \text{Select} \).
2. Scroll \( \text{to} \) \textbf{Call Barring} and press \( \text{Select} \).
3. Scroll \( \text{to} \) select Line 1 or Line 2 and press \( \text{Select} \).
4. Enter the PIN number.
   - If you enter and incorrect PIN number, an error tone will sound and “Wrong PIN!” will be displayed. Then, the display will return to idle screen.
5. \textbf{Mode} is highlighted in the display. Press \( \text{Select} \).
6. Scroll \( \text{to} \) select \textit{On} or \textit{Off} and press \( \text{Select} \) to confirm.
   - If a Call Barring number has not been set, you will be prompted to input a Call Barring number.

\textbf{Note}
To switch Call Barring mode off again from idle mode, press \( \text{Cancel} \) and enter the PIN number. \textbf{Mode} is highlighted in the display. Press \( \text{Select} \) to select \textbf{Mode}, then scroll \( \text{to} \) \textbf{Off} and press \( \text{Select} \).
Input the call barring number (up to 4 digits) and press \[OK\].

- A validation tone is emitted and the screen returns to the Call Barring menu.

### 13.4 XHD Sound

XHD (extra high definition) Sound can increase voice quality when On. The default setting is On.

To turn it off:

1. Press \[Advanced Set\] in idle mode, scroll to Advanced Set and press \[Select\].
2. Scroll to XHD Sound and press \[Select\].
3. Scroll to select On or Off and press \[Select\] to confirm.

- A validation tone is emitted and the screen returns to the Advanced Set menu.

### 13.5 Change PIN

The PIN is used for setting call barring numbers and registration/unregistration of handsets. The default PIN number is 0000. This PIN is also used to protect the settings of your handset. Your handset will prompt you whenever the PIN is required.

#### Note

The default PIN code is preset to 0000. If you change this PIN code, keep the PIN details in a safe place where you have easy access to them. Do not lose the PIN code.

#### Tip

If you forget your PIN, you will need to reset your phone to its default settings. For more details, see section 13.8 - “Reset Unit.”

### 13.6 Registration

If you wish to register an additional handset or if you have inadvertently unregistered your phone’s handset and want to re-register it, follow the procedure described below. This is the procedure for registering SE65 handsets. Procedures may vary for other types of
handsets. In this case, please refer to the manufacturer of the handset. Additional handsets must be registered to the base station before you can use them. Up to 8 handsets can be registered to one base station. The PIN is required before you can register or unregister handsets.

**Note**
By default, the PIN is 0000.

### 13.6.1 Easy registration

1. Insert the unregistered handset in the base station to automatically begin registration.
2. **Registering...** is displayed on the screen.
   - Upon successful registration, a validation tone is emitted and the handset number (1 to 8) will be assigned by the base automatically.

**Note**
Easy registration is possible only when the PIN has not been changed and is still the default PIN, 0000.

### 13.6.2 Manual registration

1. On the base station, press and hold `Menu` for 3 seconds. A beep sounds to indicate that the base is ready to accept registration.

**Note**
If no action is taken on the handset within 90 seconds, the registration procedure will be aborted. If this happens, repeat from Step 1.

2. On the handset, press `Menu`, scroll `Right` to **Advanced Set** and press `Select`.
4. Enter the PIN when prompted and press `OK` to confirm. **Registering...** is displayed on the screen.
   - Upon successful registration, a validation tone is emitted and the handset number (1 to 8) will be assigned by the base automatically.

### 13.7 Unregister

1. Press `Menu` in idle mode, scroll `Right` to **Advanced Set** and press `Select`.
2. Scroll `Right` to **Unregister** and press `Select`.
3. Enter the PIN when prompted and press `OK` to confirm.
4. Scroll `Right` to select the handset number to unregister and press `Select`. Press `OK` to confirm.
   - A validation tone is emitted to indicate successful unregistration.

**Note**
You can only use a SE659 handset to unregister a handset that does not belong to the SE659 range.
13.8 Reset Unit
You can reset your phone to its default settings with this feature. (see 13.15 “Default Settings”)

⚠️ Caution
Upon reset, all your personal settings, call log and redial list entries will be deleted and the phone will return to its default settings. However, your phonebook will remain unchanged after reset.

📝 Note
You may have to configure your phone once again.

1. Press \( \text{\textmenu}\) in idle mode, scroll \( \mathbin{\text{\textup{\textarrow}}_1}\) to Advanced Set and press \( \mathbin{\text{\textup{\textarrow}}_2}\) Select.
2. Scroll \( \mathbin{\text{\textup{\textarrow}}_1}\) to Reset and press \( \mathbin{\text{\textup{\textarrow}}_2}\) Select.
3. Reset? is displayed on the screen. Press \( \mathbin{\text{\textup{\textarrow}}_1}\) OK to confirm.
   - A validation tone is emitted.
   - The unit is reset to its default settings. (See section 13.15 below.)

13.9 Set Area Code
This feature is useful when you have subscribed to Caller Line Identification service. It allows you to set an area code in your phone. Once the local area code is set, the phone automatically filters the area code for all incoming calls, by removing the area code for local calls and retaining the area code for calls from other areas.

If it is a local call, then only the phone number of the caller is displayed during an incoming call or when you call the number from the call log. If it is a long distance call, then both the area code and phone number will be displayed in a proper format to be dialed out directly from the call log, or saved into the phonebook.

📝 Note
You can enter 3 digits for the area code. You need to subscribe to Caller Line Identification service to be able to see the caller’s number or name in the call log. See 8.1.4 “Call from the call log” for details.

1. Press \( \text{\textmenu}\) in idle mode, scroll \( \mathbin{\text{\textup{\textarrow}}_1}\) to Advanced Set and press \( \mathbin{\text{\textup{\textarrow}}_2}\) Select.
2. Scroll \( \mathbin{\text{\textup{\textarrow}}_1}\) to Area Code and press \( \mathbin{\text{\textup{\textarrow}}_2}\) Select.
3. Scroll \( \mathbin{\text{\textup{\textarrow}}_1}\) to select Line 1 or Line 2 and press \( \mathbin{\text{\textup{\textarrow}}_2}\) Select.
4. Area Code will appear in the display. Input your area code and press \( \mathbin{\text{\textup{\textarrow}}_1}\) OK to confirm.
   - A validation tone is emitted and the screen returns to the Advanced Set menu.

13.10 Set Auto Prefix
This feature allows you to define a prefix number to be added to the beginning of a number during predialling (see “Predialling” - section 8.1.1). You may also use this feature to add a detect string to match and replace the first few digits of the number during predialing.
You can enter up to a maximum of 5 digits for the detect string and 10 digits for the auto prefix number.

1. Press \(\text{menu}\) in idle mode, scroll \(\text{▼} \) to **Advanced Set** and press \(\text{▼} \) **Select**.
2. Scroll \(\text{▼} \) to **Auto Prefix** and press \(\text{▼} \) **Select**.
3. Scroll \(\text{▼} \) to select **Line 1** or **Line 2** and press \(\text{▼} \) **Select**.
4. **Detect Digit**: is displayed on the screen. Enter a detect string number (maximum 5 digits) and press \(\text{▼} \) **OK** to confirm.
5. **Prefix**: is displayed on the screen. Enter the prefix number (maximum 10 digits) and press \(\text{▼} \) **OK** to confirm.
   - A validation tone is emitted and the screen returns to the **Advanced Set** menu.

**Note**
If no detect string (blank) is entered, the prefix number will be automatically added to the predial number after \(\text{△ CALL} \) is pressed.
For numbers starting with *, # or P, the prefix number will not be added to the predial number after \(\text{△ CALL} \) is pressed.

13.11 Change Flash time
Flash time is the time delay by which the line will be disconnected after you press the \(\text{△ CALL} \) key. It can be set to short or long. The default value is **Long**.
1. Press \(\text{menu}\) in idle mode, scroll \(\text{▼} \) to **Advanced Set**, and press \(\text{▼} \) **Select**.
2. Scroll \(\text{▼} \) to **Flash Time** and press \(\text{▼} \) **Select**.
3. Scroll \(\text{▼} \) to **Short** or **Long** and press \(\text{▼} \) **Select** to confirm.
   - A validation tone is emitted and the screen returns to the **Advanced Set** menu.

**Note**
The use of your SE659 cannot be guaranteed on all PABX.

13.12 Change the Dial Mode
The default value for dial mode that is preset in your handset should be the best suited for your subscribed network and therefore you should not need to change it.
1. Press \(\text{menu}\) in idle mode, scroll \(\text{▼} \) to **Advanced Set**, and press \(\text{▼} \) **Select**.
2. Scroll \(\text{▼} \) to **Dial Mode** and press \(\text{▼} \) **Select**.
3. Scroll \(\text{▼} \) to select **Line 1** or **Line 2** and press \(\text{▼} \) **Select**.
4. Scroll \(\text{▼} \) to **Tone** or **Pulse** and press \(\text{▼} \) **Select** to confirm.
   - A validation tone is emitted and the screen returns to the **Advanced Set** menu.

13.13 Set First Ring Detection
First ring detection allows the phone to ring upon reception of the first ring signal. It is recommended that you set first ring detection **Off** if you subscribe to caller line identification service.
(When using personalized phonebook
melodies, this will prevent a normal ring tone from sounding before a melody starts playing.) If you do not subscribe to caller line identification service, it is recommended that you set first ring detection **On**. (See Section 10.4.)

1. Press "menu" in idle mode, scroll "=" to **Advanced Set**, and press "Select".
2. Scroll "=" to **First Ring** and press "Select".
3. Scroll "=" to select **Line 1** or **Line 2** and press "Select".
4. Scroll "=" to **On** or **Off** and press "Select" to confirm.
   - A validation tone is emitted and the screen returns to the **Advanced Set** menu.

**Note**
The default setting for first ring detection is **On**. The setting automatically switches to **Off** when you receive a call containing caller line identification. However, this occurs only if you do not first manually change the setting. (It does not change automatically if you manually change the first ring setting even once.)

---

13.14 Changing the Line Setting (Handset only)

**Note**
See section 12.9 for how to change the line setting from the base station.

If you have two telephone lines connected to the base unit, the line setting determines how the lines are selected when making or receiving calls. When “auto” is selected as the line setting, pressing "1" or "2" automatically connects the line that is currently free when making outgoing calls, or the line that is ringing when receiving an incoming call. (If both lines are in the same state, line 1 takes priority.) If **Auto Conference** is activated, pressing "1" or "2" lets the handset join a conversation between the external call on line 1 and another handset. If **Line 1** or **Line 2** is selected as default and the corresponding line is free, pressing "1" or "2" automatically connects to that line when making outgoing calls, or when receiving an incoming call on that line. If **Auto Conference** is activated, pressing "1" or "2" lets the handset join a conversation on the selected line between an external caller and another unit.

1. Press "menu" in idle mode, scroll "=" to **Advanced Set** and press "Select".
2. Scroll "=" to **Line Setting** and press "Select".
3. Scroll "=" to select **Auto**, **Line 1**, or **Line 2** and press "Select".
   - A validation tone is emitted and the screen returns to the **Advanced Set** menu.

14 Network Service

The network service function provides a convenient way for you to access some network provider services. A subscription is required in order to benefit from this service. Contact your network provider for details. Depending on your subscribed network, this service and menus described in this chapter may not be available in your SE659.

This setting can be made from any registered SE659 handset. It cannot be made from the base station.

14.1 Voice Mail

Use this function to access your voice mail account.
14.1.1 Access Voice Mail

1. Press \(\text{menu}\) in idle mode, scroll \(\uparrow\) to \textbf{Netw. Services}, and press \(\Rightarrow\) \textbf{Select}.
2. Scroll \(\uparrow\) to select \textbf{Line 1} or \textbf{Line 2} and press \(\Rightarrow\) \textbf{Select}.
3. Scroll \(\uparrow\) to \textbf{Voicemail} and press \(\Rightarrow\) \textbf{Select}.
4. You are now at the \textbf{Voicemail} menu and \textbf{Call} is highlighted. Press \(\Rightarrow\) \textbf{Select} to connect to the voice mail account number.

\textbf{Note}

You can also access your voice mail number by long-pressing \(1\).

14.1.2 Set Voice Mail Number

1. Press \(\text{menu}\) in idle mode, scroll \(\uparrow\) to \textbf{Netw. Services}, and press \(\Rightarrow\) \textbf{Select}.
2. Scroll \(\uparrow\) to select \textbf{Line 1} or \textbf{Line 2} and press \(\Rightarrow\) \textbf{Select}.
3. Scroll \(\uparrow\) to \textbf{Voicemail} and press \(\Rightarrow\) \textbf{Select}.
4. Scroll \(\uparrow\) to \textbf{Settings} and press \(\Rightarrow\) \textbf{Select}.
5. Enter the voice mail account number (maximum 14 digits) and press \(\Rightarrow\) \textbf{OK}.
   - A confirmation tone will sound and the display will return to the \textbf{Voicemail} screen.

15 Telephone answering machine (TAM)

Both telephone lines of your phone feature an answering machine that records unanswered calls when it is activated. The answering machine can store up to 59 messages for each line. The maximum recording time is 3 minutes per message, or 30 minutes for all messages on both lines. The maximum length of an outgoing message is 1 minute. You can use the control keys on the base station to perform the basic functions of the answering machine such as message playback, deleting messages and adjustment of volume on the base station. For a description of each function of the control keys on the base station, please see “Overview of the base station” (section 5.4) for more details. You can also use the answering machine menu to access the answering machine functions. (Functions available differ depending on whether you are using the menu on the handset or the base station.) Those procedures are covered below. There is also a menu to set the answering machine options. The telephone answering machine is ON by default. To switch the answering machine between on and off, press \(\text{on or off}\) on your base station. Alternatively, you may
switch the answering machine on and off via your handset (see section 15.6.2).

15.1 Playing Messages

15.1.1 Playback of messages via handset
The answering machine message counter blinks when there are new messages and display the number of new messages. The first recorded message is played first via the loudspeaker. When all new messages have been played, the answering machine will stop and the message counter will stop blinking.

1 Press the key in idle mode, scroll to Answer Machine, and press Select.
2 Press Select.
3 Scroll to Line 1 or Line 2 and press Select to start playing new messages.
   • The handset displays New and the number of new messages in the format 01/04, where 01 is the number of the message being played and 04 is the number of new messages.
   • If there are no new messages, the handset displays the number of old messages in the same format (however ‘New’ is not displayed.) and plays the old messages.

15.1.2 Functions available during playback
During playback, you can enable the following functions by pressing Menu. Use to scroll between the functions and press Select to confirm.

<table>
<thead>
<tr>
<th>Function</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Repeat</td>
<td>Replay the current message</td>
</tr>
<tr>
<td>Next</td>
<td>Listen to the next message.</td>
</tr>
<tr>
<td>Previous</td>
<td>Listen to the previous message.</td>
</tr>
<tr>
<td>Delete</td>
<td>Delete the message currently playing.</td>
</tr>
</tbody>
</table>

15.2 Delete all messages from the handset

⚠️ Warning
Deleted messages cannot be recovered.

⚠️ Note
Unplayed messages will not be deleted.

1 Press the key in idle mode, scroll to Answer Machine, and press Select.
2 Scroll to Delete All and press Select.
3 Scroll to select Line 1 or Line 2 and press Select.
4 Delete All? is displayed on the screen. Press OK to confirm deletion of all your messages.
   • Waiting... is displayed while the messages are deleted; then, Deleted is displayed for 2 seconds, and the display returns to the Answer Machine menu.
15.3 Turn the Answering Machine On/Off from the Handset
You can turn the answering machine on or off from the handset as follows.

1. Press the \( \text{menu} \) key in idle mode, scroll \( \uparrow \) to Answer Machine, and press \( \text{Select} \).
2. Scroll \( \uparrow \) to Answer On/Off and press \( \text{Select} \).
3. Scroll \( \uparrow \) to select Line 1 or Line 2 and press \( \text{Select} \).
4. Scroll \( \uparrow \) to select On or Off and press \( \text{Select} \).

- A validation tone is emitted and the screen returns to Answer Machine menu.

15.4 Play, Record, or Delete an Outgoing Message
You can record a personalized message to be played when the answering machine picks up an incoming call.

\( \text{Note} \)
The maximum length of an outgoing message is 1 minute.

1. Press the \( \text{menu} \) key in idle mode, scroll \( \uparrow \) to Answer Machine, and press \( \text{Select} \).
2. Scroll \( \uparrow \) to Record OGM and press \( \text{Select} \).
3. Scroll \( \uparrow \) to select Line 1 or Line 2 and press \( \text{Select} \).
4. Scroll \( \uparrow \) to select Answer & Rec. or Answer Only and press \( \text{Select} \).
5. Scroll \( \uparrow \) to select Play, Record Message, or Delete and press \( \text{Select} \).

- If Play is selected, the current outgoing message is played.
- If Record Message is selected, a beep sounds and message recording starts automatically.
- If Delete is selected and a personal outgoing message was previously recorded, Deleted is displayed. The predefined OGM is reinstated automatically.

15.5 Set the Answer mode
There are 2 answer modes available: Answer Only and Answer & Record. By default, the answer mode is Answer & Record, which lets your caller leave a message on the answering machine. This can be changed to Answer Only mode, which does not allow your caller to leave any messages on the answering machine.

1. Press the \( \text{menu} \) key in idle mode, scroll \( \uparrow \) to Answer Machine, and press \( \text{Select} \).
2. Scroll \( \uparrow \) to Answer Mode and press \( \text{Select} \).
3. Scroll \( \uparrow \) to select Line 1 or Line 2 and press \( \text{Select} \).
4. Scroll \( \uparrow \) to select Answer & Rec. or Answer Only and press \( \text{Select} \).

- A validation tone is emitted and the screen returns to Answer Machine menu.

\( \text{Note} \)
Depending on the answer mode you have selected, the appropriate default outgoing
message is played once the answering machine picks up an incoming call.

**Tip**
You can set the answering machine to play a personalized outgoing message. See 15.4 above.

15.6  Answering Machine Settings

15.6.1  Ring Delay
This is the number of rings before the answering machine answers and starts playing your greeting message. You can set the answering machine to start playing your greeting message after 3 to 8 rings or the “Economy” option. The default ring delay is Economy.

1. Press the menu key in idle mode, scroll to Answer Machine, and press Select.
2. Scroll to Settings and press Select.
3. Ring Delay is highlighted. Press Select.
4. Scroll key to select Line 1 or Line 2 and press Select.
5. Scroll key to select from 3 to 8 or Economy, and press Select to confirm.

- A validation tone is emitted and the display returns to the Settings menu.

**Note**
If Economy is selected, the ring delay depends on the answering machine’s condition.

- If there are new messages in the answering machine, it will pick up the line after 2 rings.
- If there are no new messages in the answering machine, it will pick up the line after 4 rings.
- Hence, if you want to check if you have any messages without incurring call charges, you can hang up the call after the 3rd ring.

15.6.2  Remote Access
You can check the messages on your answering machine by calling in from an outside line and entering the remote access code*. The keypad on the phone you use to dial in acts like the functions on your answering machine.

**Note**
This feature is deactivated by default.

* The remote access code (which is the same as your PIN code) prevents any unauthorised remote access of your answering machine.

15.6.2.1  Activate/Deactivate Remote Access

1. Press the menu key in idle mode, scroll to Answer Machine, and press Select.
3. Scroll to select Activate or Deactivate and press Select.
A validation tone is emitted and the screen returns to **Settings** menu.

**15.6.2.2 Controlling the Answering Machine from an external call**

1. From your external phone, dial home.
   - The answering machine answers and starts playing your greeting message.
2. Press # key and a voice prompt invites you to enter your PIN code. Enter the remote access code (same as your PIN code).
   - If the access code is incorrect, a voice prompt "Security code error, please enter again" will sound.
   - If the remote access code is correct, a short validation tone will be heard.

Operation is cancelled if the PIN code is not entered within 8 seconds. If the answering machine is off, the phone will enter into the remote access mode after 10 rings. A voice prompt invites you to enter the PIN (default is 0000) to activate the remote access feature. You can then turn ON the answering machine and play the recorded messages.

The following table indicates how to access the functions of the answering machine using the telephone keypad.

<table>
<thead>
<tr>
<th>Key</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Go to previous message.</td>
</tr>
<tr>
<td>2</td>
<td>Play the message.</td>
</tr>
<tr>
<td>3</td>
<td>Skip to the next message.</td>
</tr>
<tr>
<td>6</td>
<td>Delete the playing message.</td>
</tr>
<tr>
<td>7</td>
<td>Turn on the answering machine.</td>
</tr>
<tr>
<td>8</td>
<td>Stop message playback.</td>
</tr>
<tr>
<td>9</td>
<td>Turn off the answering machine.</td>
</tr>
</tbody>
</table>

**15.6.3 Handset Screening**

When Handset call screening is set to **On**, you can press 📞 Screen to start call screening for incoming messages. If you decide to pick up the call, press 📞. Once you pick up, the recording will stop automatically.

 millonesp
d the screen returns to **Settings** menu.

<table>
<thead>
<tr>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operation is cancelled if the PIN code is not entered within 8 seconds. If the answering machine is off, the phone will enter into the remote access mode after 10 rings. A voice prompt invites you to enter the PIN (default is 0000) to activate the remote access feature. You can then turn ON the answering machine and play the recorded messages.</td>
</tr>
</tbody>
</table>

If you have multiple handsets, only one handset can enable handset call screening for each call.

1. Press the menu key in idle mode, scroll 📞 to **Answer Machine**, and press 📞 Select.
2. Scroll 📞 to **Settings** and press 📞 Select. Then, scroll 📞 to **HS Screening** and press 📞 Select.
3. Scroll 📞 to select **On** or **Off** and press 📞 Select.
   - A validation tone is emitted and the screen returns to **Settings** menu.
### 15.6.4 Setting the Outgoing Message Language

The language of the default outgoing messages and the voice prompts is originally set to English. However, you can change the language of the default outgoing messages as follows.

1. Press the \( \text{menu} \) key in idle mode, scroll \( \text{to Answer Machine} \), and press \( \text{Select} \).
2. Scroll \( \text{to Settings} \) and press \( \text{Select} \). Then, scroll \( \text{to Voice Language} \) and press \( \text{Select} \).
3. Scroll \( \text{to select Line 1 or Line 2} \) and press \( \text{Select} \).
4. Scroll \( \text{to select the language and press} \( \text{Select} \).
   - A validation tone is emitted and the screen returns to \( \text{Settings} \) menu.

### 16 Technical data

#### Display
- Color LCD with backlight
- Selectable wallpaper
- Selectable color theme

#### General telephone features
- Caller name & number identification
- 5 standard + 10 polyphonic ringer melodies on the handset, and 5 standard ringer melodies on the base station
- Wideband synthesis for receiver and loudspeaker

#### Phonebook list, Redial list and Call log
- Phonebook list with 200 entries
- Redial list with 10 entries
- Call log with 50 entries

#### Battery
- 2 × AAA, 600mAh batteries

#### Radio specifications
- Frequency Band: 1920 - 1930Mhz
- Maximum output power: 120mW

#### Weight and dimensions
- Base:
  - 403 grams
  - 64.5mm × 123.5mm × 199.5mm (H × D × W)
- Handset:
  - 128.5 grams
  - 160mm × 28mm × 46mm (H × D × W)

#### Temperature range
- Operation: Between 0 and 35°C (32 to 95°F).
- Storage: Between -20 and 70°C (-4 to 158°F).

#### Relative humidity
- Operation: Up to 95% at 40°C
- Storage: Up to 95% at 40°C
17 Frequently asked questions

www.philips.com/support

In this chapter, you will find the most frequently asked questions and answers about your phone.

17.1 Connection

The handset does not switch on!
• Charge the batteries: Put the handset on the base station to charge. After a few moments, the phone will switch on.
• You may have accidentally switched off the handset. In this case, press and hold \( \text{Hold} \) for at least 1 second to switch it on again (see section 9.1 - “Switch the handset off/on”).

The handset does not charge!
• Check charger connections.

\( \text{Charge} \) icon is not blinking during charge!
• Battery is full: There is no need to charge the battery.
• Bad battery contact: Adjust the handset slightly.
• Dirty contact: Clean the batteries contact with a cloth moistened with alcohol.

Communication is lost during a call!
• Charge the battery
• Move closer to the base station.

The phone is “Out of range”!
• Move closer to the base station.

17.2 Set-up

Searching... is displayed on handset and \( \text{Searching} \) icon is blinking!
• Move closer to the base station.
• Make sure that your base station is on.
• Reset your unit and restart handset registration.

17.3 Sound

Handset does not ring!
Check that the Ring Volume is not set to no bars (Ringer Off), and make sure the \( \text{Ring} \) icon is not displayed on the screen (see section 12.2.1 - “Set the Ring Volume”).

Caller does not hear me!
Microphone may be muted: During a call, press \( \text{Mute} \).

There’s no dialling tone!
• No power: Check the connections.
• Batteries are empty: Charge the batteries.
• Move closer to the base station.
• Wrong line cord(s) used: Use the line cord(s) provided.
• Line adaptor is required: Connect the line adaptor to the line cord(s).
Caller does not hear me clearly!
• Move closer to the base station.
• Move the base station at least one metre away from any electronic appliances.

Frequent noise interference on my radio or television!
• Move the base station as far away as possible from the electrical appliances.

17.4 Product behaviour

Keypad does not work!
• Unlock your keypad: Long press * in idle mode.

The handset warms up when making a long call and when it is on the base station!
• This is a normal behavior. The handset consumes energy while calling and charging.

The handset cannot be registered to the base station!
• Maximum number of handsets (8) has been reached. To register a new handset, unregister an existing handset.
• Remove and replace the handset batteries.
• Try again by disconnecting and connecting the base station power supply and follow the procedure to register a handset (see section 13.6).

Caller number is not displayed!
• Service is not activated: Check your subscription with your network operator.

I cannot change the settings of my voice mail!
• Operator voice mail is managed by your operator and not the phone itself. Please contact your operator should you want to change the settings.

My handset keeps going into idle mode!
• If there are no key presses for 30 seconds, the handset will automatically return to idle mode. It will also return to idle mode automatically when you place the handset back on the base station (if auto hang-up feature is on).

Phonebook entry cannot be stored and Memory Full is displayed!
• Delete an entry to free memory before saving your contact again.

The PIN code is wrong!
• The default PIN is 0000.
• Reset the handset to revert to the default PIN code if it has been changed before (see “Reset Unit” - Section 13.8).

The answering machine does not record calls.
• Make sure the answering machine is connected to the power adaptor, and...
the power adaptor is plugged into mains supply which is switched on.

• Check if the answer machine is off, or Answer only mode is selected.
• Check to see if the answering machine is memory full. If so, delete some or all messages.
• Try switching off the power at the mains socket, and then turn it on again after 1 minute.

Unable to perform remote operation

• Make sure the remote access is on (see Section 15.6.2).
• Make sure you entered the correct remote access code.
• Use a touch-tone phone.

Note
If the above solutions do not help, remove the power from both the handset and the base. Wait for 1 minute and try again.
